

# DRIVERS 2006

## wishon 949 MC

www.twgolftech.com

(800) 470-0072 | \$329

Copper returns, this time as an added weight for optimum launch conditions and better control.

**Features:** The crown and skirt areas of the 949 MC are CNC-machined thinner to position weight more toward the heel,

toe and rear of the clubhead. The forged variable-thickness cupface is tremendously forgiving, even mis-hits up to an inch away from the sweet spot.

**Advantages:** Subtle weight-saving techniques mean not-so-subtle distance and control.

**Benefits:** All players on the 460cc bandwagon will appreciate one of Tom Wishon's best drivers.

**What We Like:** Great looks aside, this driver has amazing feel and balance, plus it's milled.

**Lineup:** 949 MC, 915CFE, 715CLC

**Clubhead:** Titanium (milled) • **Clubface:** Beta-titanium (forged) • **Volume:** 400cc, 460cc

**Loft(s):** 9°, 10.5° (no LH) • **Shaft(s):** Wishon Series 9RT graphite (S,R)
